

## Wordpress training

A breakthrough in technology which allows a normal person to create his own blog or a website without actually going through the lengthy process of web designing is more commonly famous as WordPress. It is a free and open blogging tool and a content management system all at one place. Its ever growing popularity can be attributed to the fact that its free and easier to use as compared to other design software. A comprehensively designed web template system which has numerous utility features like

- Themes – install and switch themes to suit your needs
- Plugins – tailor make your website using them to give a creative and aesthetic touch
- Widgets
- Multi – user and multi – blogging
